Introduction

THE British Columbia Manufacturers' Directory (formerly the British Columbia Trade Index) is published to provide a simplified ready reference for interested individuals and concerns at home and abroad.

The data should tend to play an important part in the further development of trade in British Columbia, resulting in added impetus to the rapid industrial expansion in our Province. Scores of new industries are now in production and several older firms have merged or expanded capacity.

With a view to having the Directory as complete as possible, it was considered necessary to use secondary sources of information for new businesses as well as for those firms that failed to report. The addresses given in the Directory are for the main place of business or head office and branches are shown in Part I.

In Part II, as far as possible, we have attempted to fit the commodities shown in the questionnaires to the headings shown on our code. This has been done to eliminate duplications in description and definition of commodities. Users are advised to look for the specific headings as well as general headings. For example, in addition to the heading "AUTOMOBILE ACCESSORIES, EQUIPMENT, OR PARTS" will be found the headings "RINGS, Piston"; "ENGINES"; "RADIATORS"; etc.

We would like to extend our appreciation to those firms answering our questionnaire, because they have made this publication possible. I wish to thank also Messrs. H. Brawn and G. M. Hayes for their thoroughness in the preparation of this Directory, Mr. W. K. Dornan, under whose general direction it was carried out, and to the Data Processing Division of the Department for their assistance.

PART II

AN ALPHABETICAL LIST OF PRODUCTS MANUFACTURED IN BRITISH COLUMBIA

☆

Detailed company addresses are listed in the buff pages of this directory.

In order that articles of a similar nature will appear close to one another in the Directory, the word of the heading considered most important has been placed first; i.e., furniture, household, bedroom; fish, canned, salmon; castings, brass or bronze. In cases where the inversion seems misplaced, the headings have been listed in their customary sequence. Precise commodity descriptions are used wherever possible.

To facilitate the work involved in compiling the Directory, abbreviations have been resorted to, such as "Co. Ltd." for "Company Limited."

The asterisk (*) against the firm names on the following pages denotes companies engaged or interested in export trade.
